Mountain Weather Forecast

Ground Conditions Supplement

Date: Sunday 17 March Location: Dale Head summit at 11:13 Full report: A mild, wet, and windy day with many of the higher tops shrouded in cloud for the majority of the day. The Lakeland fells and are essentially snow-free, apart from a few small patches that remain on steep north and east-facing slopes above 900m (and would have been melting today). These are found predominantly on Helvellyn and neighbouring fells and are not in areas that present any hazards to walkers. Despite today's mild temperatures, summit wind chill (feels-like temperatures) are often in negative figures, especially in wet and windy conditions. Full winter clothing (warm and waterproof) including hats and gloves, and equipment including a map, compass and headtorch are all essential. Temperature: plus 6.9C, Maximum wind speed 22.1mph, Wind chill: plus 1.7C, Average wind speed: 19.0mph
